Shelly

Shelly Plus i4

Smart scenes activation with enhanced control.

Shelly Plus i4 allows manual activation or deactivation of any created scene, running synchronized actions, or executing complex trigger scenarios. Shelly Plus i4 can control other connected Shelly relays, sensors, or HTTP and MQTT-controlled devices. Small enough to be behind every wall switch, Shelly Plus i4 can show the status and control the action of four inputs.

Wi-Fi operated

Wide range voltage support

Scripting

Bluetooth inclusion

Up to 12 possible actions

Extremely fast processor

ULTIMATE COMFORT

No more getting out of bed when you forgot to switch off the living room lights and phone is nowhere around.

Shelly Plus i4 allows manual control of other Shelly devices. Now the full control of your house is just one hand away!

MULTI ACTIONS SUPPORT

Shelly Plus i4 can be installed behind the most convenient wall switch and used to activate scenes or actions from the other Shelly devices with as much as a push of a button. Shelly Plus i4 supports up to 3 different actions per button, which makes it convenient for quick manual control over a group of devices.

COMPLEX SCENES CONTROL

Manually activate or deactivate complex scenes. Shelly Plus i4 can run synchronized actions of several Shelly devices. Customers can install Shelly Plus i4 close to the front door of the home and turn off/on all the lights in the house with one push of the button, saving time when in a hurry.

Smart bulbs control like never before!

Shelly Plus i4 is compatible and can control any given smart bulbs brand (including Philips Hue).

Furthermore, Shelly Plus i4 can be used to set the light color or the dimming/brightening level of the smart bulbs. All that needs to be done is add and configure one of Shelly scripts or webhooks created specifically for Shelly Plus i4.

All of them are available [here](#).

Perfect match!

Shelly Plus i4 is perfect for Shelly Wall Switch for Smart Relays – 4 button switch. Each button can activate up to 3 different actions.

That means that only one 4 button switch would allow as much as 12 scenes trigger and execution!

Highly compatible!

Use your preferred **voice assistant** to control Shelly Plus line of devices!

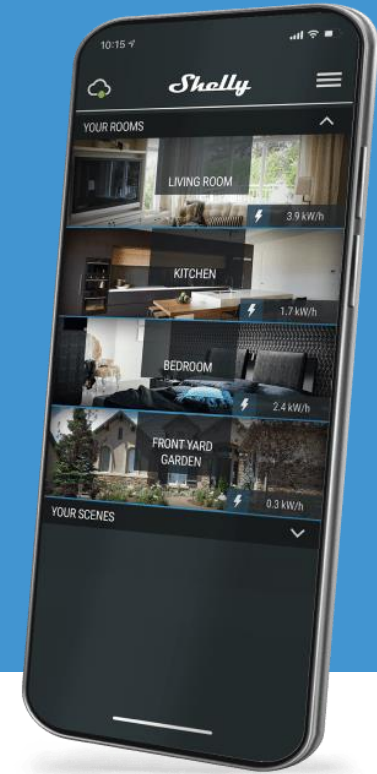

Alexa, turn on the lights!

Sure! Turning on the lights.

No hub required!

Shelly Plus Line devices can be controlled directly and without a hub through your smartphone with **Shelly Cloud App**.
